Forecast for Thursday 22 Jun 2023

Weather: A largely dry and sunny morning, perhaps with a few mist patches in valleys first thing, but these quickly clearing. Scattered cloud developing again by late morning with a chance of showers into the afternoon. Showers could locally become thundery, but many hills should remain dry. Showers easing during the evening.

Chance of cloud-free hill tops above 600m: 95%

Low Cloud and visibility: Any cloud that builds is expected to remain above the summits. Very good visibility in general, but locally moderate to poor in afternoon showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

UV levels will be very high so adequate sun protection is required. Although most places will be dry, there is still a chance to be caught by a heavy, thundery shower in the afternoon.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Wed 21 Jun 2023	0mm	11.4mm	37.2mm

Forecast for Friday 23 Jun 2023

Weather: A fine, dry and fairly bright morning, but with a strengthening breeze. Cloud thickening by the afternoon, perhaps to bring a some outbreaks of mainly light rain, generally across the west of the area. There is a low risk of more persistent, heavier rain or drizzle developing towards the end of the day.

Maximum wind: Southwesterly 15-20mph, with gusts 25-30mph.

Chance of cloud-free hill tops above 600m: 95% at first, lowering to 60% in the west, 80% in the east.

Low Cloud and visibility: Cloud generally above hills, but some patches of low cloud possible, mainly in the west to 500-600m during rainfall in the afternoon. There is a low risk of more widespread cloud lowering to around 400m in the west in association with any more persistent rain or drizzle. Visibility generally very good, but becoming moderate and perhaps locally poor in any rain or drizzle later.

Temperature: **Valleys:** Plus 14 Celsius rising to Plus 21 Celsius.
At 600m: Plus 12 Celsius rising to Plus 16 Celsius.
Freezing level: Above summits.
